Low, Standard or High Flow versions available in each size

HoseGuard Description

A pre-set air fuse that offers simple but effective protection for pneumatic systems in the event of a broken compressed air hose or pipe.

Reduces the potential for an air hose to break and whip around violently while potentially damaging equipment and injuring personnel. Should the volume of air exceed the factory pre-set value, the HoseGuard automatically senses this increase and immediately shuts off the air supply.

HoseGuard Benefits

- Protects personnel, equipment and facilities from dangerous pneumatic hose breaks
- Maintenance friendly - a small bleed allows for easy repairs if/when a hose does break.
- Reliable, factory pre-set and tamper proof. No adjustment necessary. Simply install.
- Lightweight, compact size and compatible with all pneumatic systems.
